@Revant Singh Bisht

New Delhi, palam

I am a third-year B.Tech Computer Science student at ADGIPS with a growing passion for web development, data analysis, and software engineering. I enjoy working in collaborative team environments and believe in learning through both experience and feedback. I'm always open to improving by learning from my mistakes and continuously building on my skills. With a strong problem-solving mindset and a passion for technology, I aim to contribute meaningfully to projects while growing as a developer.

EDUCATION :

B.Tech - Computer Science Dr. Akhilesh Das Gupta Institute of Professional Studies 2023-2027
Current CGPA : 7.3

12th standard Army Public School, Delhi Cantt 2022-2023

10th standard Army Public School, Bangalore 2020-2021

LANGUAGE :

- ENGLISH
- HINDI

AREA OF FOCUS:

Web Development | Data Analysis | Software Engineering Methodologies | Application Design & Development

SKILLS :

TECHNICAL

- **Programming Languages:** C, C++, Python
- **Database:** SQL
- **Web Technologies:** HTML
- **Tools:** Microsoft Excel, Powerbi, Canva, VS code, CapCut

WORK EXPERIENCE :

Social Media Marketing Intern
Techwhoop | *June 2024 – July 2024*
● Created and circulated Google Forms to collect reviews and feedback from students on content and platform experience.
● Compiled and organized response data in Google Sheets for analysis.
● Analyzed student preferences to identify content trends and improvement areas.
● Presented structured insights to senior team members to guide social media strategy and content planning.

ACADEMIC PROJECTS :

Deloitte Technology Job Simulation – The Forage *June 2025*
● Completed a virtual job simulation focused on **technology consulting and software development**.
● Contributed to **Python coding tasks**, simulating real-world challenges in the tech domain.
● Gained practical experience in software **development lifecycle**, including debugging, testing, and writing clean code.
● Developed solutions aligned with **Deloitte's standards for innovation and problem-solving**.

URL Shortener Web Application | Python, Flask, SQLite
• Developed a web-based URL shortening service that generates unique short links and redirects users to original URLs.
• Designed and implemented backend logic using Flask with SQLite for persistent data storage.
• Structured database schema for efficient URL mapping and retrieval.
• Implemented input validation and modular project architecture for scalability.

Dota 2 Hero Ability Quiz Game | Python
• Built a command-line quiz application that tests users on hero abilities using structured datasets.
• Implemented dictionary-based data modeling to store and manage hero–ability mappings.
• Used randomization logic to dynamically generate quiz questions and evaluate user input.
• Organized hero data into modular batches to improve maintainability and scalability.
• Applied conditional logic and loops to manage scoring, validation, and game flow.
